TABLE OF CONTENTS

INTRODUCTION

This booklet provides you with a listing of about 750 commonly used English words, with their phonemes and hex codes. With this listing you can find the words to let your Robot speak its mind on almost any subject.

In addition, the Phoneme Chart is reprinted twice in this booklet to help you troubleshoot and create words. The second chart is reorganized so that the phonemes are presented in alphabetical order; this organization makes it easier to find the sound you need when you create words. Space is provided on the last few pages for you to enter favorite words or phrases, or special words that you create yourself.

PHONEME DICTIONARY

The compilation of words was selected to fill more than one need. First, the 750 or so words must try to do the job of over 150,000 words that are available in a good English dictionary. Second, these words must be useful to typical speech patterns and apply to things you would typically want the Robot to say. The selected words follow, with the phonemes (to help you understand and create other words) and the hexadecimal numbers for entry in speech programs. A typical entry is shown on Page 4.

To make this dictionary more useful, remember to:
Look for homonyms and rhyming words
   ("sun" and "son")
   (use "stickey" to get "tricky"

Use parts of words
   (use "suggestion" to get "suggest")

use two words to build another
   (use "key" and "board" to build "keyboard")

PHONEME CHARTS

Each of the following two charts contains the same information (phonemes and the hexadecimal codes that make the Robot say each phoneme), but they are organized differently. The first chart is organized according to the hexadecimal code, so that you can find the phoneme if you know the hexadecimal number. The second chart is organized alphabetically by phoneme, so that you can find the hexadecimal number you want if you know the sound you wish to make.
